Connect to our servers from any internet connected Windows PC and access ALL features to streamline your practice and perform billing duties from anywhere. Call or email for information on our web-based ASP service.

Why choose iNtelli-Bill?

Over the past 30 years we've gathered information on submitting claims to individual insurance companies and have learned plenty. All payers have varying requirements that must be met before they will accept a claim. Some consider this a delay tactic by the insurance companies to keep billers constantly questioning their data and at times just giving up on refilling and ultimately getting the claim paid.

We excel at providing our clients with increased revenue!

At iNtelli-Bill we rely on our many years of experience in the medical industry and utilize our proprietary software HorizonMIS™ to get it right the first time.

Our software is iNtelligent. It constantly searches for issues before the claim is submitted and this means fewer rejections. Fewer rejections; better odds for getting the claim paid.

In a recent audit from one of our Clearing Houses we were rated #1 for least rejections on initial claims.

iNtelli-Bill get's you PAID!

For 2010 they reported us having a low 1.41% rejection rate for all initial claims submitted. This compared to the 3% - 5% from other billing clients was considered phenomenal.

If we do receive a rejection our experienced and skilled billing staff works tirelessly to decipher why it was rejected, resubmit, and get it PAID!

Add Practice Management

Our PREMIUM offer for your Practice is to utilize our Practice Management System in conjunction with the Billing Service. Everything is in “The Cloud” so you have no special equipment to buy. You access our system over the internet from your existing Windows PC’s.

The Practice Management System provides you with the following features...

- Appointment Scheduling
- Patient Registration
- Patient Inquiry
- Detailed Insurance Eligibility Verification
- Patient Co-Pay Information and Verification
- Financial Reports
- Full and transparent access to your financial data at our billing service
- Work with the exact same data we do and stop data version inconsistencies
- EMR/EHR Data Exchange via Standard HL7 Interface
- Tools to help you meet “Meaningful Use” and qualify for stimulus money
- Complete Daily Backup of your Data

**Remotely and securely
access our servers
through the internet.**

With the Practice Management System and iNtelli-Bill Billing Service our staff teams with your staff with direct and secure communications through the Practice Management system.

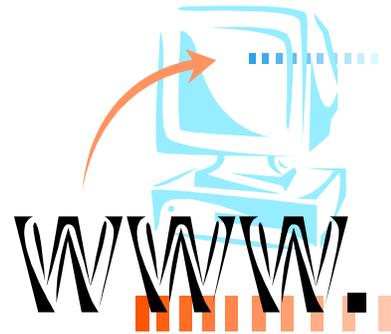

How is the PM System deployed?

Everyone has heard the phrase “To the Cloud” on TV commercials, print, and radio. But what does it mean?

Explanation from Wikipedia:

“Cloud computing refers to the provision of computational resources on demand via a computer network. Users or clients can submit a task, such as word processing, to the service provider, without actually possessing the software or hardware. The consumer's computer may contain very little software or data (perhaps a minimal operating system and web browser only), serving as little more than a display terminal connected to the Internet. Since the cloud is the underlying delivery mechanism, cloud based applications and services may support any type of software application or service in use today.”

We've used this type of technology with our Practice Management and Billing Software for many years—well before someone coined the catchy phrase “The Cloud”.

What does this mean for your Practice?

In short, it means that to utilize our Practice Management system you have no special equipment to purchase. You will not need an expensive server in your office to access our systems.

All you will need is a stable internet connection and your existing Windows PC. Take your office with you... access our service from multiple locations including different offices and even your home.
